An introduction to
RPS in NORWAY

Local Knowledge
INTERNATIONAL EXPERTISE

rpsgroup.com
RPS, having merged the skills and experience of Metier and OEC, is Norway’s leading project management consultancy and solution provider. We have proven skills and experience for implementing solutions on both small and large scale projects in a professional and responsible manner.
Secure & Stable
ADDING VALUE

RPS has grown into one of the world’s pre-eminent consultancies by underpinning our local connections with the resources and knowledge of an international business. We employ more than 5,000 people across Europe, North America and the Australia Asia Pacific regions.
RPS in Norway employs more than 250 people.

**Open & Responsible**

**STAKEHOLDERS**

RPS conducts business in a responsible, safe and sustainable manner, through effective interaction with our clients and suppliers, the wider community and the environment.
Welcome to RPS in Norway

RPS is Norway’s leading project management consultancy and solution provider built around the proven skills and capabilities of OEC, Metier and Delphi. Our mission is to add value and deliver success for our clients. We operate across a broad range of industry sectors and clients, including both public sector and private organisations.

Our services and solutions are expertly managed by experienced people working within a defined process, using tools that help to give a consistent, documented and auditable approach to projects and project driven companies.

RPS also provides corporate project management training programs and project management certifications.

Metier Solutions
Metier is a well-established brand in Scandinavia within project management, strategic advisory, management consulting, training and certifications through Metier Academy. Metier has proven to be a leading full-service provider of project management and solutions, and has shown over time that the keys to success are good systems and governance, the right methodology and specialised competence. The company will continue to market Metier Solutions under RPS Norway. Metier’s products and project systems will also be exported internationally within the RPS Group.

Our primary markets include:
- Infrastructure and The Built Environment
- Hospital & Healthcare Centres
- Energy and Oil & Gas
- ICT and Digitalisation

RPS in Norway manages large construction projects across the country.
Midgardsormen - more than 3kms of sewer system providing huge environmental benefits for Oslo.

Trusted Leaders
OF OUR PROFESSIONS

RPS has a reputation for meeting the challenges posed by large, complex projects and problems and conducting business in an open and responsible manner. RPS staff hold memberships in more than 250 professional bodies across the world, as well as numerous highly respected, senior advisory and professional posts.
Large construction and infrastructure projects are key market areas for RPS in Norway. We develop projects from master planning right through design, to construction support for clients both in public and in private sectors. These include hospitals, schools, residential developments, mixed use schemes, manufacturing facilities, roads and railroad projects. We deliver all project management services necessary to meet defined project targets.

Midgardsormen is one of the largest sewage projects in Norway and one of Oslo’s most important environmental initiatives. RPS was involved in all aspects of the project management and have collaborated with many partners in pioneering new initiatives of micro tunnelling. The result is a state-of-the-art sewer system with more than 3kms of tunnels beneath Oslo, providing good water quality and significant environmental benefits for the city.

RPS supplied the total project management team for the combined new head offices of Gjendisige, a major Norwegian insurance company, and NSB, the Norwegian Railroad company. The 33.000m² building in the centre of Oslo won the annual governmental architectural award in 2013, along with a BREEAM Excellent certification.

Kirkenes Hospital is a county hospital for the population of East-Finnmark. The new city centre hospital is a pilot project for ‘off-site industrialisation’ and has a total area of 20.000 m², with a capacity for 46 hospitals beds and 8 hotel beds. It is expected to be completed and ready for handover and full operation in 2017. RPS has been responsible for all project management from the feasibility design phase to completion.

RPS has extensive expertise in building hospitals from early planning to organisational development.
Successful Partners
DELIVERING QUALITY

Delivering focused and cost-effective advice on both well understood problems and emerging challenges enables us to maintain long-standing partnerships with our clients.

RPS has over 30 years experience in engineering and project management of oil and gas fields in the North Sea.
Energy and Oil & Gas

During the last ten years, RPS in Norway has been heavily involved with project development and execution of FLNG, FSRU and FSPO projects, as well as greenfield and brownfield projects for fixed installations. We have also been engaged as project managers for windfarms and hydro power plants.

We are a reliable partner in the field of executing projects from early phase to completion, executing project management and control, procurement and contracts administration and engineering management. Through the Project Academy we provide training services to ensure necessary competence and structure for a successful project execution delivered on time.

Det norske oljeselskap has implemented best practices for project management to increase their competitive edge. “RPS Norway is an important partner for Det norske oljeselskap and helps ensure best practices in project management (with several consultants) as well as building the competence within the Ivar Aasen project.”

Bård Atle Hovd, VP Projects

Through the Lundin Project Academy, RPS has helped establish a common project language and best practice within methodology, procedures and project control. We have also provided contract advising and project management services for the Edvard Grieg project.

RPS is responsible for the worldwide FMC Technologies Project Academy. “The Project Academy will ensure that all of our employees are trained to be professional project managers and team members. This will help us meet our customers’ expectations and be the most trusted project provider, through flawless execution.”

Rune Thoresen, CEO

The rise of the first windmill at the Fakken windfarm in Troms, North of Norway.
Creative People
MAKING A DIFFERENCE

As the world around us changes RPS responds by developing the range of its services. We have a unique group of talented staff who operate in multidisciplinary teams, providing creative and cost effective solutions for the increasingly complex problems facing our clients.
ICT and Digitalisation

RPS project management expertise has been used extensively throughout the years to support major Information and Communications Technology (ICT) projects. Our focus is to improve our client’s ability to realise business oriented goals through appropriate and effective ICT programs and projects.

We ensure our clients have access to professional training and guidance in combination with the consistent use of best practice methodologies and tools for realising the successful planning and execution of projects.

RPS has been serving the Norwegian Public Roads Administration with project management services since 2012 and are currently engaged in an innovative new solution for the national motor vehicle register called Autosys. RPS has a team for project governance supporting the project director, and are responsible for the planning, estimation and procurement process for the project.

We are also leading a programme to modernise the issuing of passports and national identities throughout Norway. RPS will be instrumental in the project management and procurement as well as the development and implementation of new solutions and processes that will revolutionise the current system.

Professional management and good planning ensures excellent results throughout all stages of our projects.

RPS was appointed by the Norwegian government to project manage what will be one of Norway’s most culturally significant public buildings.
